

# complete apc solutions

Complete turn-key gas cleaning, cooling and scrubbing systems for a broad diversity of applications including:

Multi-pollutant systems	DeNOx (SCR, SNCR)
Dedusting	DeSOx (dry and wet)
Evaporative gas cooling	Hg control
Acid Gases	VOCs and THCs

Experience and proficiency in supplying systems in the following industrial sectors:

Steel	Industrial and utility boilers
Cement and lime	Foundry
Waste-to-energy	Other

## turnkey systems

BoldEco supplies complete turnkey installations from basic and detailed engineering, to procurement, erection and commissioning, as well as ongoing maintenance programs which ensure that your system performs to design throughout its lifetime. All results are fully guaranteed.

## equipment financing

Financing is available for complete systems as well as for retrofits and upgrades. No payments are required until the system or retrofit is fully commissioned. Terms of financing range from 5 to 10 years and qualify off balance sheet as an operating expense, which may provide additional tax benefits.

## upgrades and optimization

Add-on systems and components can be supplied as part of an upgrade to enhance the performance of existing air pollution controls. These systems and components are designed by our experienced engineering staff and are fully guaranteed to perform compatibly with existing equipment.

Existing controls performance can be enhanced with various retrofit strategies, including:

- Equipment upgrade with more efficient components
- Equipment redesign and modification
- Controller upgrade
- Addition of high-performance components
- Addition of back-end polishing system
